Subject: Revised Final Analytical Tables
James River Inc. Mill No. 8
Fitchburg, Massachusetts
TDD No. F1-9002-12
Reference No. \$375MAM1IS
CERCLIS No. MAD065777344

Dear Mr. Collette:

Enclosed are copies of the revised final inorganic analytical tables for the Screening Site Inspection completed for James River Inc. Mill No. 8 (CERCLIS No. MAD065777344) by NUS/FIT I under TDD No. F1-9002-12.

As a result of an audit completed by the U.S. EPA Region I Environmental Services Division it was determined that the positive barium and sodium results in sample MAP623 (sample location SS-06) should not have been estimated. In addition, it was determined that the quantitation limit for cadmium in sample MAP623 should not have been estimated (UJ'd). Therefore, the "J" qualifiers have been removed from the barium and sodium positive results and the "UJ" qualifier has been removed from the cadmium quantitation limit for sample MAP623.

Please replace the original inorganic analytical tables with the enclosed revised tables.

If you have any questions, please contact the U.S. Environmental Protection Agency State Coordinator, Nancy Smith, at (617) 573-9697.

Sincerely,

Robert Jubach
FIT Regional Manager
